OMEGA LIFE-3: ITEM #22776, LOT #K06044, EXP 11/08
(COMP OF 20) (AVG WT = 1.4266GM) (AVG FILL WT =1.0644 GM) (SS = 2 SOFTGELS)

<u>ASSAY</u>	<u>ANALYSIS</u>	<u>UNITS</u>
FATTY ACIDS		
20:5 EICOSAPENTAENOIC (EPA)	40.29	AREA %
22:6 DOCOSAHEXAENOIC (DHA)	20.98	AREA %

METHOD REFERENCES

FATTY ACIDS
Council for responsible nutrition. Omega 3 DHA, Omega 3 EPA, voluntary monograph, 2006 (modified) and AOAC 991.39 (modified).

The following explanation of results is provided by Jordan Hyde, Unicity International's Global Director of Quality Assurance.

Each soft gel is 1000mg (1gm) a serving is 2 soft gels (2000mg or 2 gm). The average fill weight per soft gel is 1.0644 grams (1064.4 mg).

EPA tested at 40.29 percent or 402.9 mg per soft gel/805.8 mg per serving, based on label claim. Based on the average fill weight of 1.064 grams per capsule this is actually 428.8 per softgel or 857.69 per serving (on average).

DHA tested at 20.98 percent or 209.8 per soft gel/419.6 per serving, based on label claim. Based on the average fill weight of 1.064 grams per capsule this is actually 223.3 per soft gel or 446.62 per serving.

So we easily meet the [label] claim of 800/400.
